ABOUT ME

Former SEO Copywriter looking for a new career path. I've been working with web technologies since around 2009, and I've been consistently expanding my knowledge of web development and cybersecurity since 2023. On a daily basis, I carry out more projects in which I try to combine issues from both areas of my interest. As a person with a significant disability, I've developed strong time management and adaptability skills, which enhance my ability to work independently and stay motivated. These experiences have reinforced my determination to succeed in this new career path.

My tech stack:

- JavaScript ES6+.
- Node.js (Express.js).
- React.js 18.
- MySQL.
- Docker.
- Jenkins.
- LINUX.
- VPS.

PROJECTS

Notes web application

My first, more expanded fullstack JavaScript project. The application allows to manage your own short notes. In addition, each user can add a profile photo, change their e-mail address, or prioritize individual notes.

TECH STACK : Express.js, Vanilla JS, MySQL, TailwindCSS, Jenkins, Docker, NGINX.

My portfolio

First project in React.js. It took quite a long time to create, but an additional goal of its implementation was to learn the library ecosystem. During my work, I explored a lot of secrets and best practices of working with React.
